Quality Analyst

Goby, creator of the leading cloud-based platform for Invoice Automation and ESG solutions, seeks an exceptional Quality Analyst to work in a fun, fast-paced Agile team. As a member of the Product Team, you will play a key role in continuing to refine and improve Goby's software product, which makes use of the entire Force.com range of programmatic and declarative development tools, including Apex, Visualforce, Lightning Apps & Components, Einstein Analytics, Partner Communities, process automation, security, and more. The Goby Product Team also supports the Salesforce Service Cloud.

A Quality Analyst at Goby will:

- Demonstrate sound knowledge and experience in testing / quality assurance methods and principles
- Take responsibility for project assignments and lead the QA effort by understanding requirements, independently testing code, demonstrating accurate translations of requirements and reviewing results with peers and seniors.
- Act as a QA voice for major development projects
- Write, implement, & document test cases to identify bugs and confirm requirements were met
- Conduct exploratory testing to evaluate robustness and functionality of software modules and features
- Design, develop, and implement automated and data-driven testing protocols
- Write and maintain unit and functional tests
- Communicate software integration and cross-feature problems or bugs, and identify broken or malfunctioning code
- Use data visualization and analytics tools to more efficiently identify errors or bugs

A strong candidate for the position will possess and/or be able to demonstrate the following skills and abilities:

- 1 - 2 years of experience preferred
- Strong background in core Force.com platform concepts (Apex classes, triggers, security, data modeling, workflow, validation rules, custom settings, etc.)
- Familiarity with Agile and scrum methodologies
- Excellent interpersonal, verbal, and written communication skills
- Ability to effectively interface with non-technical stakeholders
- A positive, entrepreneurial attitude, ability to independently solve problems, and be highly adaptable
- Willingness to work in downtown Chicago
- Experience with Lightning Components and Visualforce
- Experience with SQL Databases & Queries, Python, ETL tools
- Experience with Wave Analytics
- Experience with Atlassian tools (Bitbucket, Jira, Confluence, etc.)
- Interest in sustainability, real estate, AP automation, and Big Data

This position is not eligible for visa sponsorship at this time
